**<https://ryzen.pro/navigator>**

**Edition dated July 07, 2024**  
**Build #1.1.0**

# INTRO

## DOWNLOAD

- [Download now](#) [ZIP, 322MB]

The archive contains AMD Navigator installation file, Kiosk and Windows mode files, and PDF Guide.

## GUIDES

- [Kiosk mode](#)
- [Windows mode](#)
- [User guide](#)

## PREREQUISITES

- We recommend to use the latest available build of the product.
- Perform installation under administrator account (or account with administrative privileges).
- We recommend that you remove the currently installed version before installing AMD Navigator.
- AMD Navigator is installed on system disk, there is no way to change the installation path.
- Temporarily deactivate antivirus software before starting installation.
- If system requires a reboot (e.G. After installing windows updates or other applications), please reboot the machine before starting installation of AMD Navigator. This will help avoid conflicts with locked files.

**Scan to open the Guide  
on your mobile device.**

# SECURE KIOSK MODE

Local (non-Administrator) account  
Task Manager Disabled  
Password Manager Disabled  
Windows Access Disabled

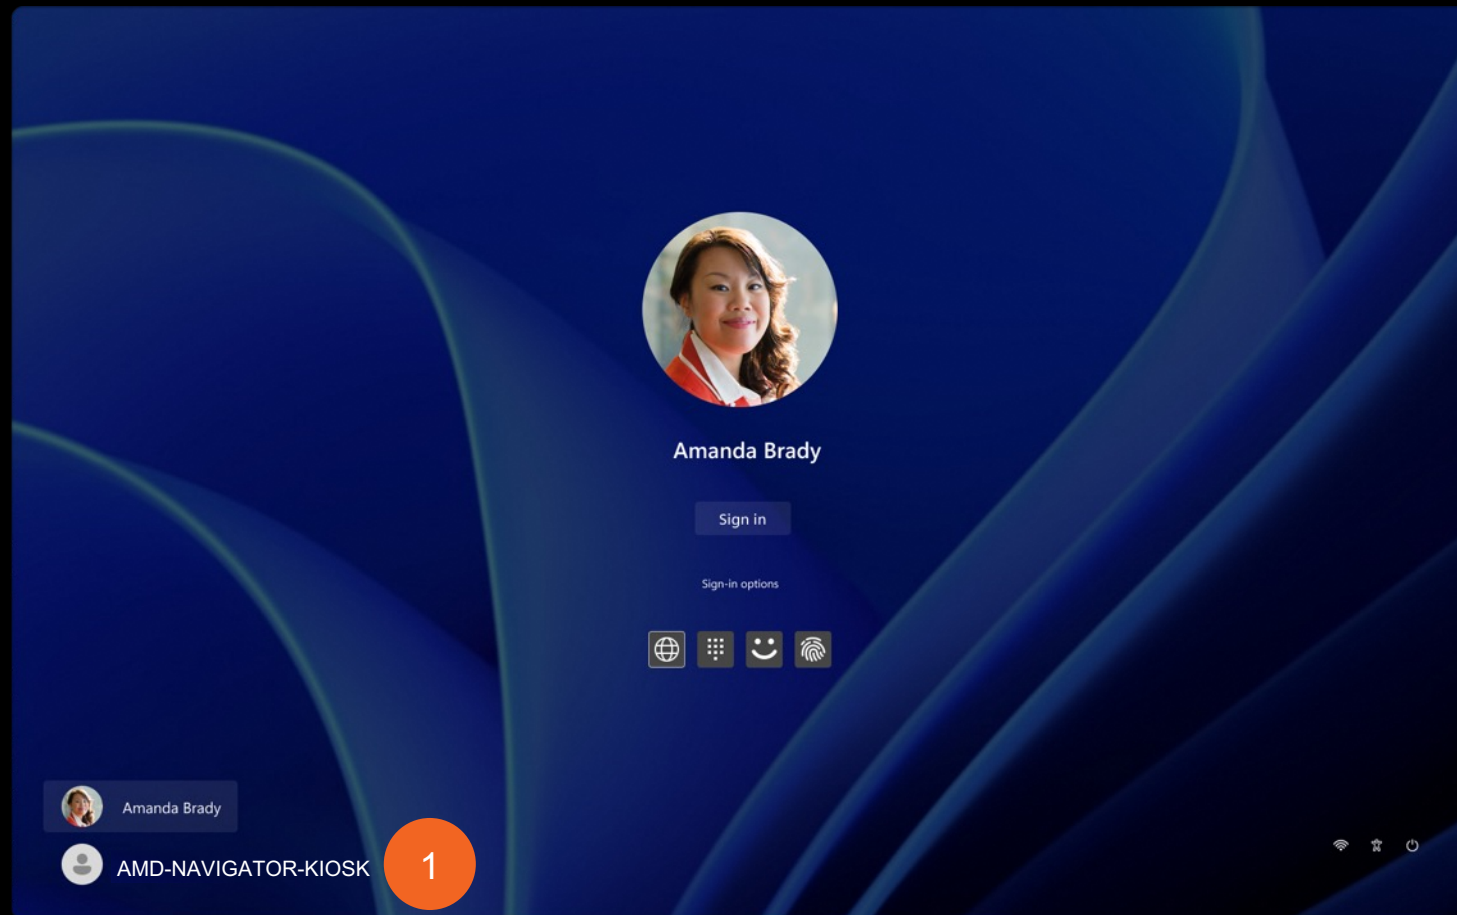

**For security reasons**, create a password for current Administrator account, if the password has not yet been set:  
Select **Start > Settings > Accounts > Sign-in options**. Under **Password**, select **Change** and follow the directions.

# 2-CLICKS SECURE KIOSK MODE ACTIVATION

1. **Install** the **AMD Navigator app** – Run the **AMD Navigator Setup 1.0.xx.exe** installation file under protected administrator account, accept the license agreement and click Install, uncheck the “Launch” checkbox.
2. **Run** the **AMD Navigator Kiosk.exe**.
3. **Log in** the **AMD-NAVIGATOR-KIOSK** account (1) with one-time password “**amd**”.
4. **Wait** until the first loading completes and app starts – no action required.

## Done!

To work with the PC normally, use **CTRL+ALT+DEL** to log out the **Kiosk** user and log in the **Administrator user**. Please remember your administrator password.

# SECURE WINDOWS MODE

Local (non-Administrator) account

Task Manager Disabled

Password Manager Disabled

Windows Access Enabled

**For security reasons**, create a password for current Administrator account, if the password has not yet been set:

Select **Start > Settings > Accounts > Sign-in options**. Under **Password**, select **Change** and follow the directions.

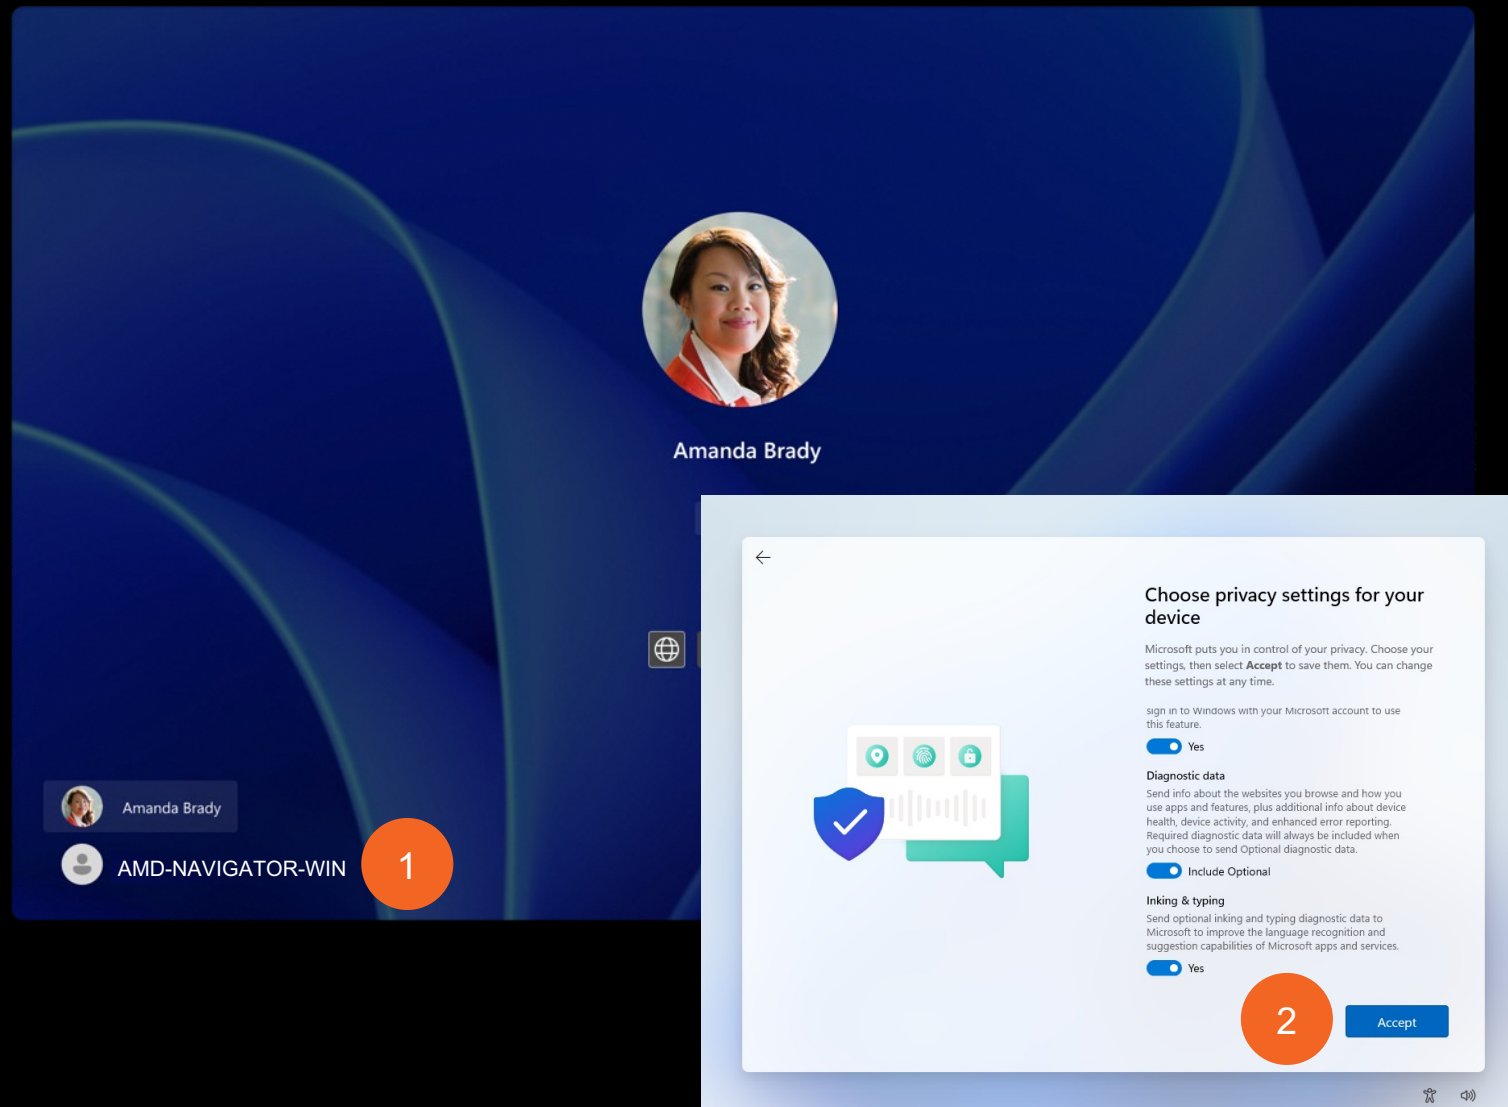

# 3-CLICKS SECURE WINDOWS MODE ACTIVATION

1. **Install** the **AMD Navigator app** – Run the **AMD Navigator Setup 1.0.xx.exe** installation file under protected administrator account, accept the license agreement and click Install, uncheck the “Launch” checkbox.
2. **Run** the **AMD Navigator Windows.exe**.
3. **Log in** the **AMD-NAVIGATOR-WIN** account (1) with one-time password “**amd**”.
4. **Wait** until the first loading completes and click **Accept** on the privacy screen.

## Done!

To work with the PC normally, use **CTRL+ALT+DEL** to log out the **Windows** user and log in the **Administrator user**. Please remember your administrator password.

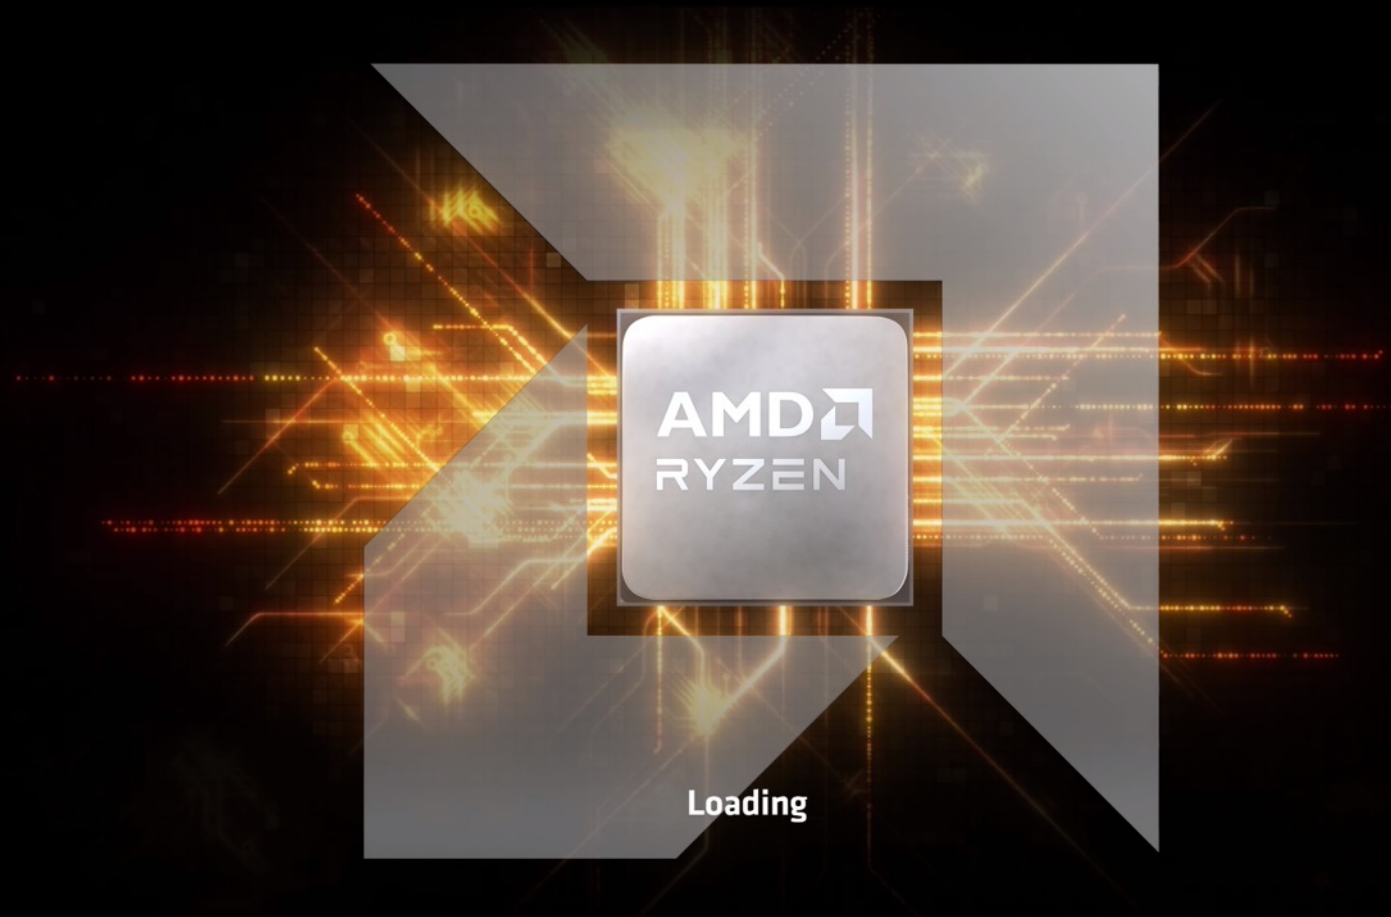

# USER GUIDE

# HOW TO INSTALL

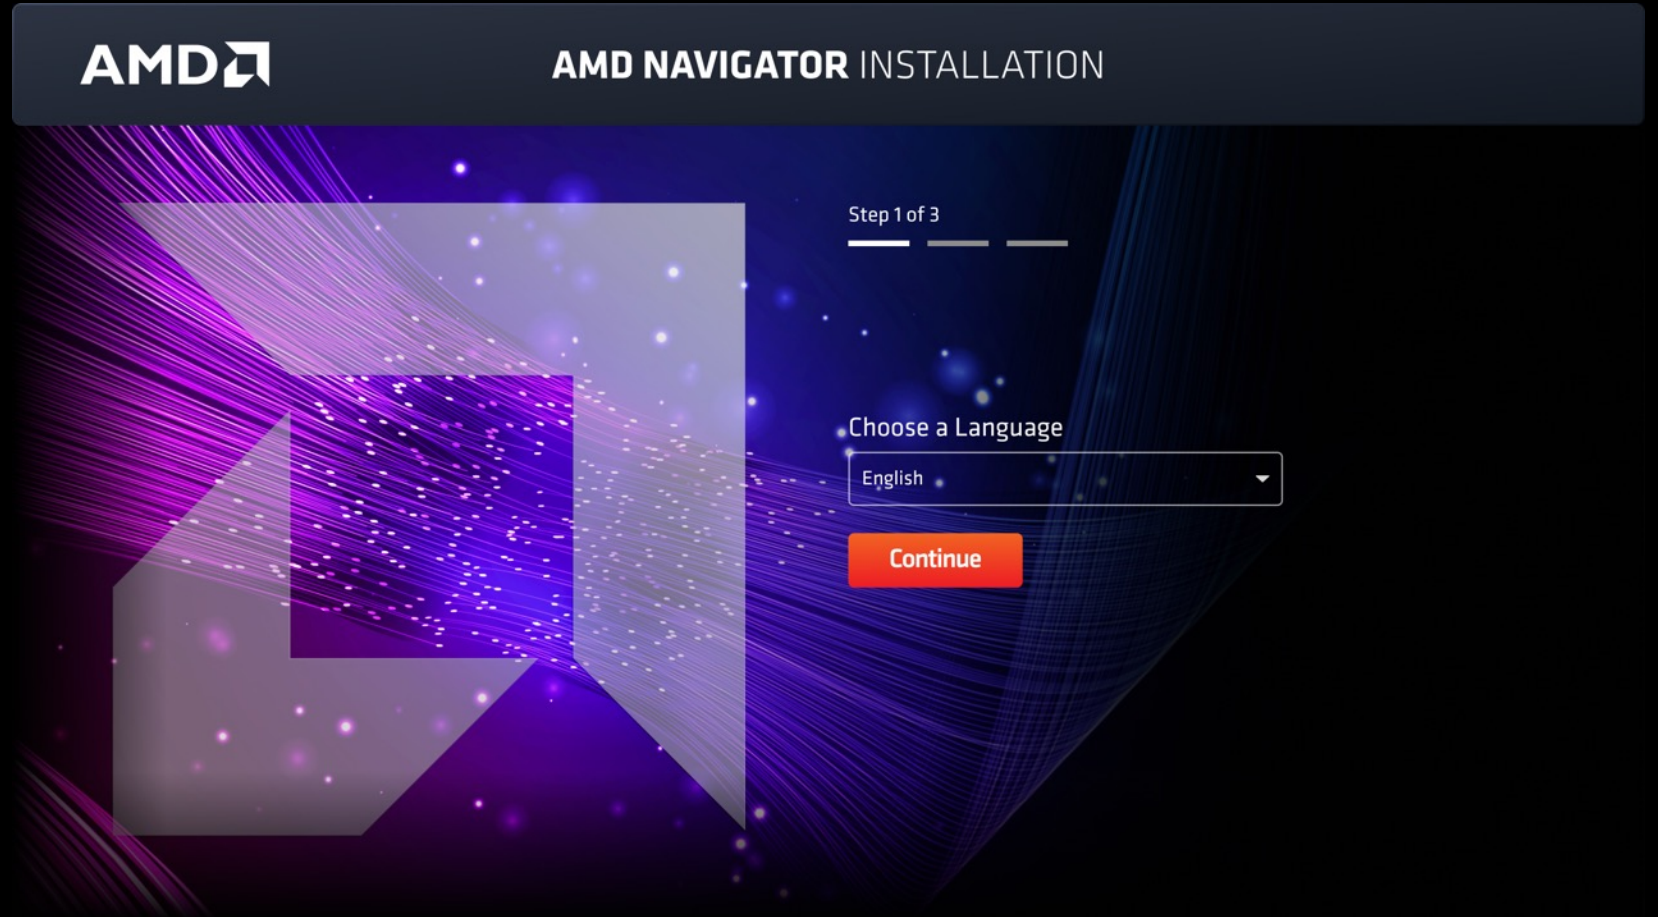

1. Run the installation file, accept the license agreement and click Install.
2. The AMD Navigator will then be installed.
3. Open the application.
4. Wait until the first loading completes.
5. Now you can use the new AMD Navigator.

# INSTALLATION – STEP 1

1. Choose your preferred language.
2. Click “Continue”.

# INSTALLATION – STEP 2

- 1. Fill in the form using the prompts to the right of each field.
- 2. There is an option to add a Store Logo.

# INSTALLATION – STEP 3

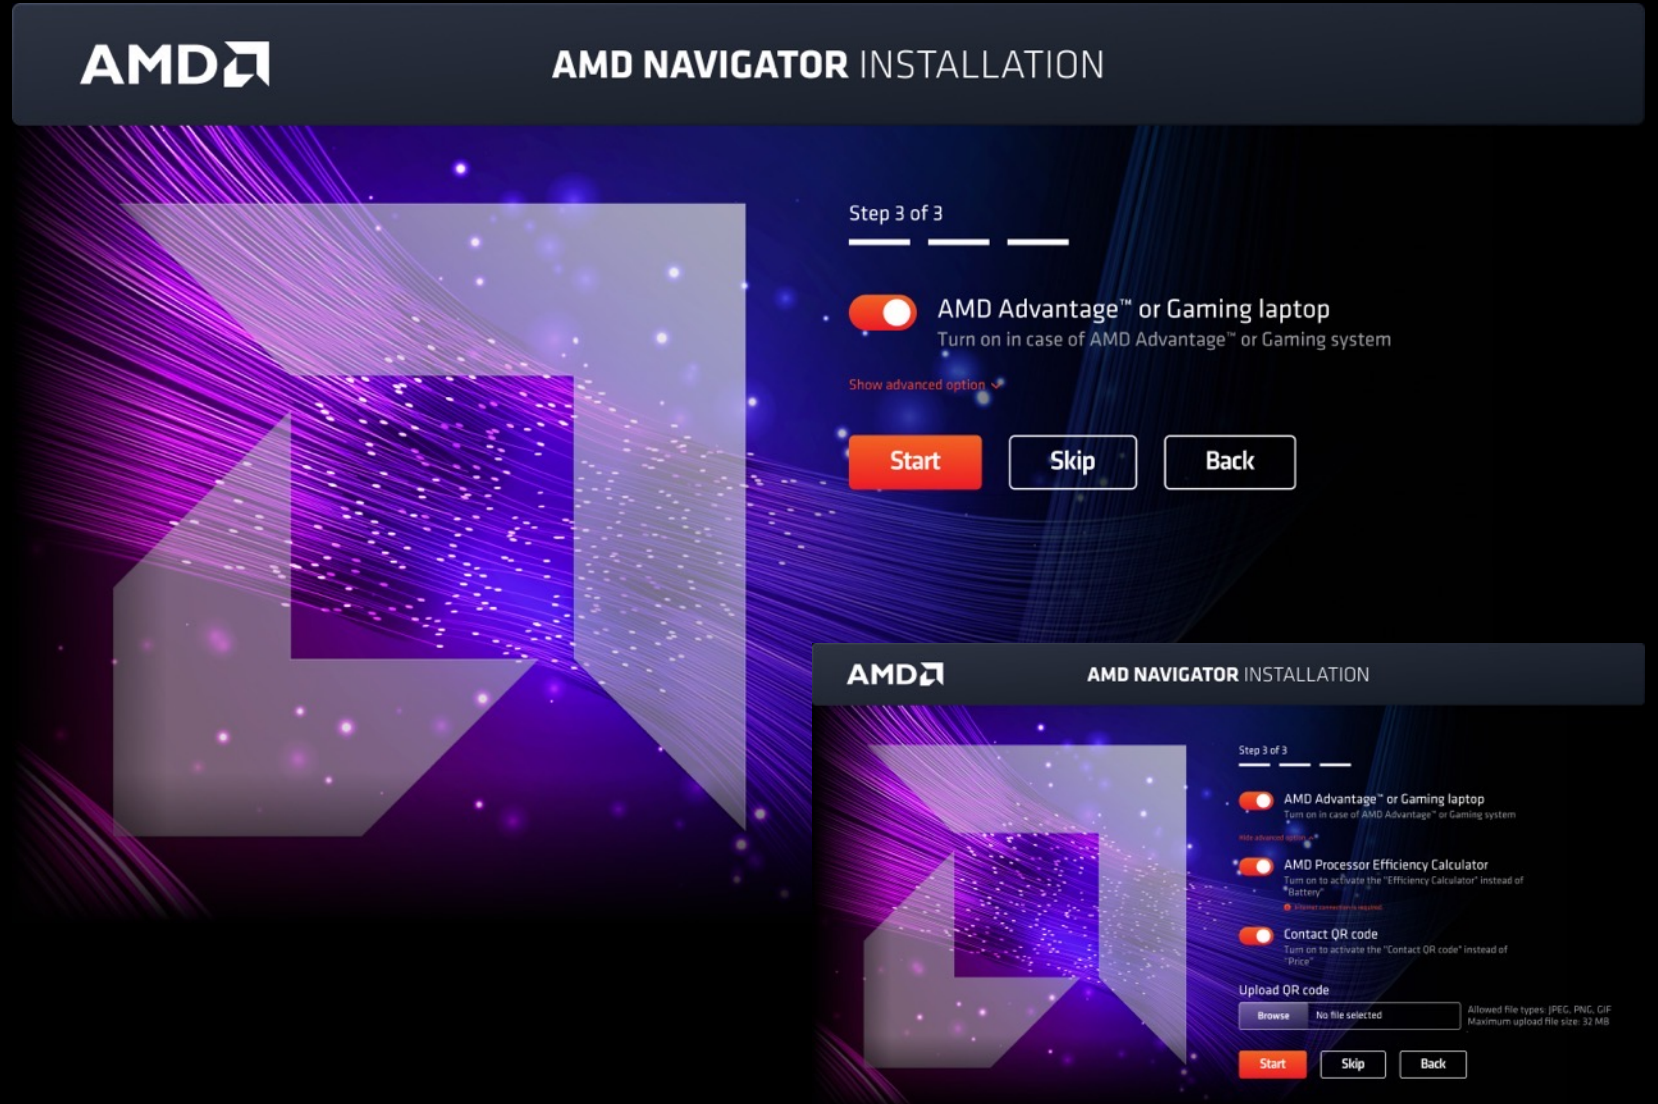

1. The app features classic and game (AMD Advantage) modes.
2. Advanced options are also available.

## Advanced options

1. AMD Processor Efficiency Calculator activates a sub-page with <https://pecalculator.amd.com/> instead of Battery sub-page, internet connection is required.
2. Contact QR code is used to show QR code of AMD sales representative instead of Price (Step 2).

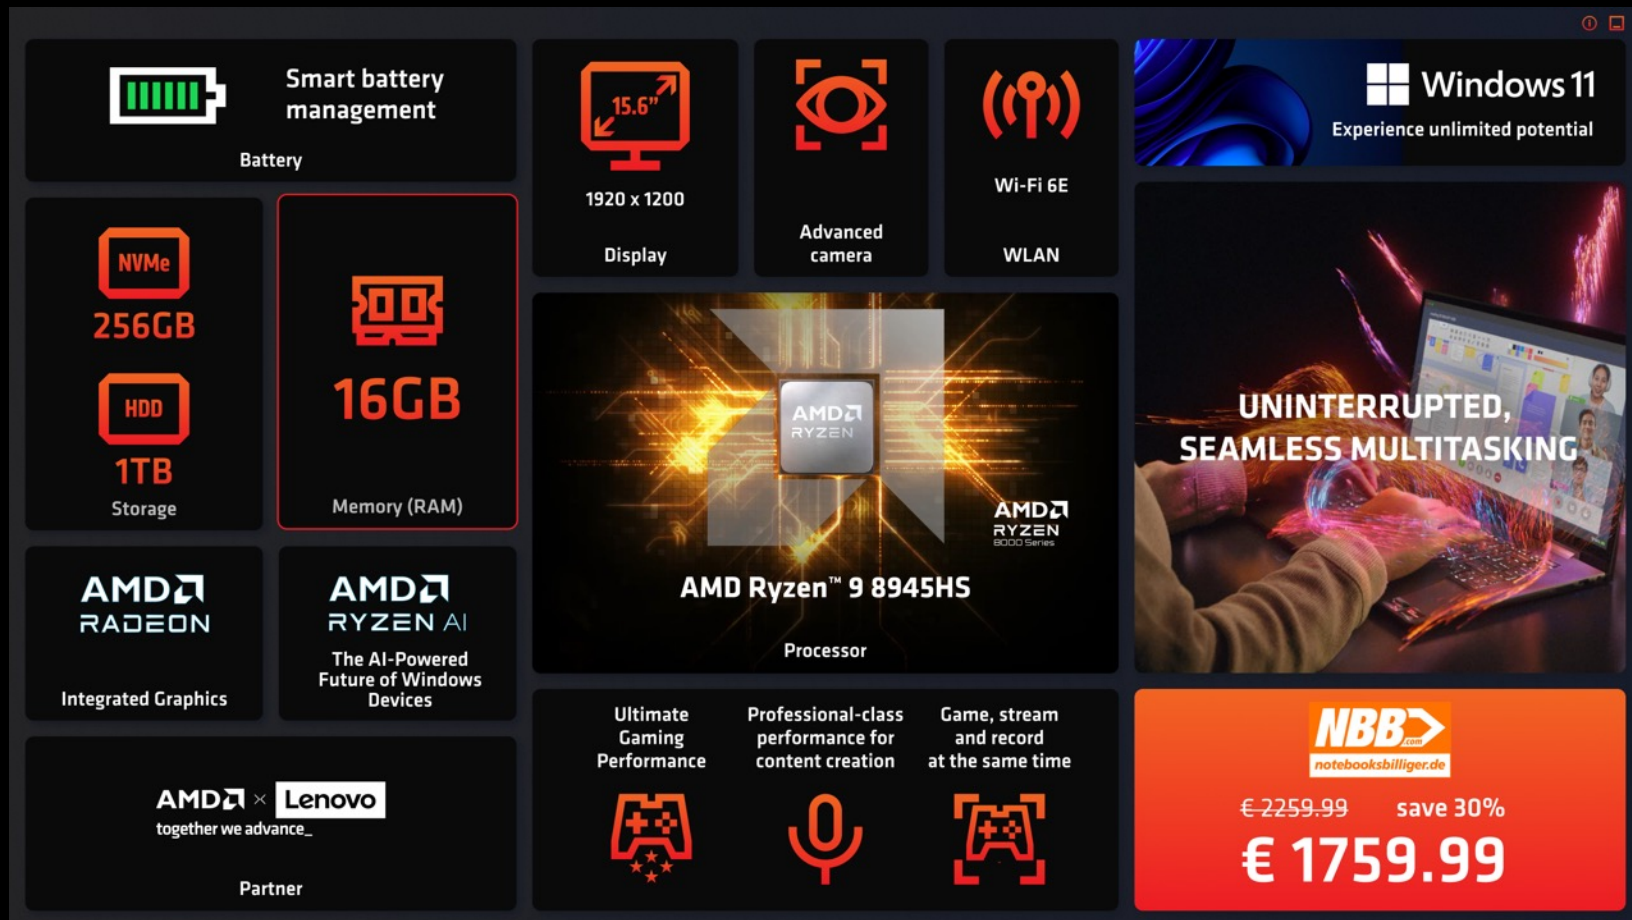

## How to create QR code?

- Open <https://qrcode-monkey.com>
- Fill “Your URL” field:  
For email: <mailto:name@example.com>  
For business card: <https://example.com>
  - Select “Choose Colors”:  
Foreground Color: #FFFFFF  
Background Color: #181818
  - Click on the “Create QR code” button
  - Click on the “Download PNG”

# CLASSIC MODE

1. To open a sub-page, click on the desired section – Processor, Graphics, Windows 11, Ryzen™ AI, Storage, Memory, Battery/Power Efficiency, Display, Camera, WLAN.
2. To minimize the app, click the “\_” icon in the top right corner of the window.
3. To open an Admin Dashboard, press “ALT+DEL”.
4. Supports non-PRO and PRO systems designs.

# GAME (AMD ADVANTAGE) MODE

1. Turn on in case of AMD Advantage™ or Gaming system.
2. To open a sub-page, click on the desired section – Processor, Graphics, Windows 11, Ryzen™ AI, Storage, Memory, Battery, Display, Camera, WLAN.
3. To minimize the app, click the “\_” icon in the top right corner of the window.
4. To open an Admin Dashboard, press “ALT+DEL”.

The screenshot displays the AMD Advantage Mode interface, which is a dashboard for system specifications and gaming features. The interface is organized into a grid of tiles. The top row includes tiles for Battery (3X LONGER), Storage (256GB NVMe, 3X FASTER), Memory (16GB), and Windows 11. The middle row features Amplified Performance (AMD Radeon 6800 XT), a central Processor tile (AMD Ryzen 9 7540), Premium Displays (144Hz+), and a 'BUILT TO GAME' section. The bottom row contains an Advanced camera, Wi-Fi 6E WLAN, a 'Built to Game' section (100+ FPS), a Partner section (AMD x Republic of Gamers), and a pricing section (NBB, €1759.99).

# RELEASE NOTES

Build #1.2-3.0 2024-10-01

- Massive back-end update: local storage, variables, functions.
- Search engine update.
- Storage and RAM optimizations.
- CPU QR code update.
- FR, RO, HR, BG languages added.
- Design improvements and bug fixes.

Build #1.1.0 2024-07-07

- Admin search engine update.
- Design improvements and bug fixes.
- Video updates.

Build #1.0.19-20 2024-05-23

- Secure Kiosk mode app added.
- Secure Windows mode app added.
- 3-steps installation update.
- Price field design update.
- Language issue fixed.
- Timer issue fixed.
- RAM and Storage values fixed.
- Ryzen PRO design mode added.
- AMD Processor Efficiency Calculator and QR code features added.

Build #1.0.18 2024-04-16

- Ryzen AI screensaver added.
- Ryzen PRO badge update.
- Ryzen AI and Windows content updates.

Build #1.0.17 2024-03-21

- Design improvements.
- Windows 11 and Ryzen AI updates.
- Ryzen PRO design support.
- Bug fixes.

Build #1.0.16 2024-02-01

- CPUs and GPUs update.
- GPUs naming updates.
- Design improvements.
- Content updates.
- Bug fixes.

Build #1.0.14 2023-12-07

- Spanish and Italian languages added.
- Design improvements.

Build #1.0.13 2023-10-05

- Radeon sub-page update.
- Ryzen and Ryzen PRO videos updates.

Build #1.0.10 2023-09-29

- Bug fixes.
